

Building and prototyping with Claude Code

<https://www.youtube.com/watch?v=DAQJvGjlgVM>

Using multiple Claude instances that do different things so they don't interfere with each other, for example one for questions and another one for code.

CLAUDE.md is a concept of memory, the best place to tell Claude what is the code, objectives, etc.

We should invest in CLAUDE.md to increase the quality of the output.

Claude SDK is a powerful tool, we can bring our own implementations of Claude with our personal rules etc.

Prototype an Agent → Using Claude SDK

It's all about communication between Claude and the Prompt Engineer.
